Style # 8973

By now you know we design our socks to purpose. We design socks like shoes: lock in the heel, lock in the mid foot. Our V-tech Arch Support System is revolutionary in fit and leaves your toes room to move freely.

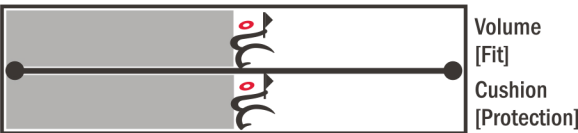

- Protective cushioning provides ultimate protection without bulking up in your shoe or collapsing during rigorous workouts.
- Sensitive knit construction ensures your sock top will be super comfortable and leave no pressure marks.
- Balega's patented V-tech Arch Support System ensures your sock will not move, giving you non-constricting all day comfort.
